as of January 2, 2022

Week Ending	December 20, 2020	January 9, 2022
Weekly COVID Cases Among Nursing Home Residents	34,094	32,061
Weekly COVID Deaths Among Nursing Home Residents	6,219	645
Weekly COVID Death Rate per 1,000 Nursing Home Residents	5.68	0.60

LONG TERM CARE RESIDENTS AND STAFF MUST BE PRIORITIZED BY PUBLIC HEALTH OFFICIALS

- Testing
- Treatments
- Workforce support
- Extending the Public Health Emergency declaration
- Flexibility to limit visitations during outbreaks
- Increasing vaccinations and booster shots among the general public
