Licensure Term  Assisted Living Residences, Comprehensive Personal Care Homes and Assisted Living Programs

Opening Statement  New Jersey’s Department of Health (DOH), Division of Health Facilities Evaluation and Licensing, licenses three types of assisted living services: (1) assisted living residences, which are new construction; (2) comprehensive personal care homes, which are converted residential boarding homes that may not meet all building code requirements; and (3) assisted living programs, which are services agencies providing services to tenants of publicly subsidized housing and cannot become licensed as an assisted living residence. Assisted living residences and comprehensive personal care homes may collectively be referred to as assisted living facilities. Facilities providing assisted living services require a certificate of need to be licensed.

In 2012, DOH collaborated with The Health Care Association of New Jersey Foundation to create a voluntary program titled Advanced Standing. To receive the department’s distinction of Advanced Standing, a facility must comply with all applicable local, state, and federal regulations as well as submit quality data that reaches benchmarks established by a peer review panel. Once these requirements are satisfactorily met, DOH will make the final determination on Advanced Standing. A facility that participates in the Advanced Standing program does not receive a routine survey by DOH. However, any time a facility falls below DOH standards, such as poor performance on a complaint investigation, that facility can be removed for cause from the program by DOH. In addition, DOH provides follow-up surveys based on a random sample of facilities that participate in the program. The program is open to all licensed assisted living residences and comprehensive personal care homes.
**Definition**

Assisted Living: A coordinated array of supportive personal and health services, available 24 hours per day, to residents who have been assessed to need these services including persons who require nursing home level of care. Assisted living promotes resident self-direction and participation in decisions that emphasize independence, individuality, privacy, dignity, and homelike surroundings.

Assisted Living Residences: A facility which is licensed by DOH to provide apartment-style housing and congregate dining and to ensure that assisted living services are available when needed, for four or more adult persons unrelated to the proprietor. Apartment units offer, at a minimum, one unfurnished room, a private bathroom, a kitchenette, and a lockable door on the unit entrance.

Comprehensive Personal Care Home: Provide room and board to ensure that assisted living services are available when needed, to four or more adults unrelated to the proprietor. Residential units in comprehensive personal care homes house no more than two residents and have a lockable door on the unit entrance.

Assisted Living Program: The provision of or arrangement for meals and assisted living services, when needed, to the tenants (also known as residents) of publicly subsidized housing which—because of any Federal, State, or local housing laws, rules, regulations or requirements—cannot become licensed as an assisted living residence. An assisted living program may also provide staff resources and other services to a licensed assisted living residence and a licensed comprehensive personal care home.

**Disclosure Items**

Facilities must disclose their policies concerning Medicaid admissions to prospective and current residents. Providers must distribute a statement of residents rights, which are specified in regulation.

**Facility Scope of Care**

Facilities provide a coordinated array of supportive personal and health services 24 hours per day, including assistance with personal care, nursing, pharmacy, dining, activities, recreational, and social work services to meet the individual needs of each resident. The assisted living residence, comprehensive personal care home, or assisted living program must be capable of providing nursing services to maintain residents, including residents who require nursing home level of care.
**Third Party Scope of Care**

Facilities may contract with licensed home health agencies.

**Admission and Retention Policy**

New Jersey has no entry requirements or restrictions. Mandatory discharge is required if a resident requires specialized long term care, such as respirators, ventilators, or severe behavior management. Facilities may specify other discharge requirements, such as if the resident is bedridden for more than 14 consecutive days; requires 24-hour nursing supervision; is totally dependent on assistance with four or more activities of daily living; has a cognitive decline severe enough to prevent the making of simple decisions; has a stage III or IV pressure sore; has multiple stage II pressure sores with exceptions; requires more than assistance with transfer; is a danger to self or others; or has a medically unstable condition or special health problem that cannot be properly addressed in the assisted living environment.

**Resident Assessment**

Upon admission, each resident must receive an initial assessment to determine his or her needs. If the initial assessment indicates that the resident requires health care services, a health care assessment must be completed within 14 days of admission by a registered professional nurse using a form either from the Department or meeting specified criteria. Residents must be reassessed in a time frame that depends on the type of service plan they have in place.

**Medication Management**

Certified nurse aides, certified home health aides, or staff members who have other equivalent training approved by the Department of Health and who have completed a medication aide course and passed a certifying exam are permitted to administer medication to residents under the delegation of a registered nurse (RN). Allowable injections include epinephrine and pre-drawn insulin injections as well as disposable insulin delivering mechanical devices commonly known as "pens." Effective January 2013, an assisted living facility may request a waiver from the Department that will allow the RN to delegate to certified medical aides the administration of injectable medications (in addition to insulin) via disposable, integrated, mechanical medication delivery devices that are prefilled by the manufacturer.

**Square Feet Requirements**

For newly constructed assisted living residences or alterations or renovations to existing buildings to create a residence, private resident units must provide a minimum of 150 square feet of clear and usable floor area and semi-private resident units must provide a minimum of 80 additional square feet for an additional resident. This calculation excludes closets, bathroom, kitchenette, hallways, corridors, vestibules, alcoves and foyers unless there is written request from the applicant to consider an alcove, foyer or vestibule.
Residents Allowed Per Room
A maximum of two residents is allowed per resident unit.

Bathroom Requirements
For newly constructed assisted living residences or alterations or renovations to existing buildings to create a residence, a bathroom with a toilet, bathtub/shower, and sink must be located in each resident unit. Additional toilet facilities located in areas other than the residential units must be provided to meet the needs of residents, staff, and visitors to the facility.

Life Safety
Smoke detectors are required in all resident bedrooms, living rooms, studio apartment units, and public areas of the facility. A comprehensive automatic fire suppression system is required throughout the building (in accord with the Uniform Construction Code), unless an exemption has been applied for and granted. New Jersey uses National Fire Protection Association standards.

Unit and Staffing Requirements for Serving Persons with Dementia
Facilities that advertise or hold themselves out as having an Alzheimer’s unit are required to establish written policies and procedures for the unit, establish criteria for admission and discharge from the unit, have staff attend a mandatory training program, compile staffing information, and provide, upon request, a list of activities directed toward Alzheimer’s residents and safety policies and procedures specific to residents diagnosed with Alzheimer’s.

In a facility that advertises or holds itself out as having an Alzheimer’s/dementia program, training in specialized care shall be provided to all licensed and unlicensed staff who provide direct care to residents with Alzheimer’s or dementia.

Staffing Requirements
An administrator must be appointed. An administrator or their designated alternate must be available at all times and on site on a full-time basis in facilities with 60 or more licensed beds and on a half-time basis in facilities with fewer than 60 licensed beds. Staffing must be sufficient to meet residents’ needs. At least one awake personal care assistant and one additional employee must be on site 24 hours per day. An RN must be available 24 hours per day.

Administrator Education/Training
Administrators must be at least 21 years of age and possess a high school diploma or equivalent. Administrators must also either hold a current New Jersey license as a nursing home administrator or be a New Jersey certified assisted living administrator.

Administrators must complete a minimum of 30 hours of continuing education every three years relating to assisted living concepts and
related topics.

**Staff Education/Training**

The facility or program shall develop and implement a staff orientation and a staff education plan, including plans for each service and designation of person(s) responsible for training. All personnel shall receive orientation at the time of employment and at least annual in-service education regarding topics such as, but not limited to: the provision of services and assistance in accordance with the concepts of assisted living and including care of residents with physical impairment; emergency plans and procedures; the infection prevention and control program; resident rights; abuse and neglect; pain management; and the care of residents with Alzheimer’s and related dementia conditions.

Personal care assistants must either successfully complete an approved nurse aide training course, an approved homemaker/home health aide training program, or other equivalent approved training program. They must complete at least 20 hours of continuing education every two years in assisted living concepts and related topics, including cognitive and physical impairment and dementia.

Medication aides must complete an additional 10 hours of continuing education related to medication administration and elderly drug use every two years.

**Entity Approving CE Program**

The New Jersey Nursing Home Administrators Licensing Board grants continuing education credit for continuing education programs approved by any one of the following entities: the National Association of Long Term Care Administrator Boards (NAB); a member state of the NAB; state or national associations or professional societies of licensed nursing home administrators; state or national associations of long-term healthcare facilities; state or national accredited institutions of higher learning; and state or national professional boards practicing in areas relevant to nursing home administration and the care of nursing home residents.

**Medicaid Policy and Reimbursement**

Assisted living facilities and the assisted living program are reimbursed under the NJ Medicaid Managed Long Term Services and Supports (MLTSS) waiver. New Jersey consolidated its home and community-based waiver programs into one 1115 waiver, which includes coverage of assisted living services. All Medicaid recipients residing in an assisted living residence, comprehensive personal care home, or receiving services in an assisted living program are required to choose a health care provider from within a managed care network.
